

Answers to Questions from TT 6.1

Name: Tran Quang Huy
Student ID: 106212636

Hand execution using a trace table

*Demonstrate how the following code is executed in the computer.
Name for the function: sum_list*

```
def whatDoesThisFunctionDo(data):  
    result = 0  
    i = 0  
    while i < len(data):  
        result = result + data[i]  
        i = i + 1  
    return result
```

Draw and complete a trace table for the following two sets of data and place the result in the table below:

data	Result
[6, -3, 3, 8, 1]	
[2, 6, -2, 3]	

Result 1 : 15
Result 2: 9

Once you have completed your trace tables (below) write the name you chose for the function above:

Place your trace tables below:

For data set: [6, -3, 3, 8, 1]

Loop	i	Result
First loop	0	0
1	1	6

Loop	i	Result
2	2	5
3	3	6
4	4	14
5	5	15

For data set [2, 6, -2, 3]

Loop	i	Result
First loop	0	0
1	1	2
2	2	8
3	3	6
4	4	9
