

## TNE10006/TNE60006 – Sample Mid-Sem Skills Assessment (Option C)

### Network Topology and Addressing Table

**Note:** use Cisco Catalyst 3650 switches and a Cisco 4321 router to build the network. If using ATC devices, use Router 1 for NBA, Switch 3 for Lakers and Switch 4 for Bulls.

### Complete the following tasks:

- Configure the hostname and a MOTD on **all devices**
- Configure SSH on **NBA**. Domain-name **ccna.lab**, username **midsem**, pwd **skills**
- Allocate switchports **Gi1/0/7-10** on **Bulls** to the **Coaches** VLAN
- Configure trunking between the **Lakers** and **Bulls** switches
- Configure the **NBA** router as a **router-on-a-stick**
- IP addresses configured on all **NBA** interfaces must be the **second-last usable** address in the allocated range
- **Lakers** management IP must be the **first usable** address in the range
- **Bulls** management IP must be the **second usable** address in the range
- Configure **Loopback0** on **NBA** with IP network **202.150.254.16/28**
- Access ports in the **Coaches** VLAN must be configured with port-security. Allow a **max. of three MAC addresses**. Configure **sticky** MAC address learning.
